- PIVX 4.0.2

Added to Community-Voting

- ALLSAFE
- BITCOIN2
- BITCOIN TOKEN
- CTSCOIN
- MEREBEL
- REECORE

ECOSYSTEM-CHANGELOG

General

- Infrastructure upgrade
With growing user numbers and new features it was time to upgrade the underlying hardware. We put the site into maintenance on January 18th for about 13 hours to improve the webserver and database-server and switch to a more scalable solution. The new implementation has more hardware resources, a better configuration and the possibility to dedicate the different apps technically, if necessary.
- New landing page
We also updated the homepage during the server upgrade. Firstly, we wanted to achieve a continuous design between backend and landingpage and secondly, all new changes and numbers had to be brought up to date.
At the same time we have started to design and publish more detailed subpages for the individual apps offered. The new website is not SEO optimized yet and not all info-pages are finished, but we are working on it.

- New Team-Member: Matt
We are very happy to welcome Matt in our team. Matt will support us with the development of our native coin SCC. With his C++ skills he has already implemented the first fixes and improvements. Glad to have you with us.
Link: <https://github.com/stakecube/StakeCubeCoin/commits/master>
- New Team-Member: Gr33k
We are very happy to welcome Gr33k in our team. Gr33k will assist us in security topics with his professional advice. He will also try to find security gaps and carry out coordinated attacks. The aim is of course to increase security constantly. Glad to have you with us.
- Roadmap for Q1 2020 planned and published
Along with the new homepage, we have published the roadmap for 2020/Q1. We have successfully completed all planned tasks/goals for January.
<https://stakecube.net/#roadmap>
- Meatec partnership
We are pleased to announce an official partnership with Meatec, a mining supplier based in Germany. We are already running a pilot project. More info about the company and the planned goals follows.
Link: <https://meatec.io/>

- Ethereum integration tests started
We have started the testing phase to integrate ETH into StakeCube. We cannot give a date for availability at this point.
- Exchange listed on coingecko.com
Our exchange has been integrated back into coingecko.com. Data can now be viewed on the popular coin- and exchange aggregator.
Link: <https://www.coingecko.com/en/exchanges/stakecube>
- Untracked exchange listing on coinmarketcap.com
Exchange listing/tracking on CMC requested. According to coinmarketcap.com, the exchange does not yet meet all requirements. We do not agree, because all criteria are fulfilled. We are currently in discussion and hope for a complete tracking soon.
Link: <https://coinmarketcap.com/exchanges/stakecube/>
- AML & KYC implementation postponed to 29th february 2020
Link: <https://stakecube.net/app/academy/stakecube-aml-policy>
