2. Copy DASH address

Description

Dash (DASH) is digital cash that aims to offer financial freedom to everyone. Payments are fast, easy, secure, for near-zero fees. Dash was built to support real-life use cases, aiming to provide a fully-decentralized payments solution. The Dash Network includes thousands of merchants, exchanges and brokers around the world.

Market Cap	Circ. Supply:	Total Supply:	Current Block:

7. DASH get credited to your account after a few minutes

The screenshot shows the Stakecube dashboard interface. At the top, there is a blue header with the 'stakecube' logo on the left and a user profile icon labeled 'oleg' on the right. Below the header is a navigation menu with tabs for 'Overview', 'Activity', 'Earnings', 'Masternodes', 'Interest', and 'Media'. The 'Activity' tab is currently selected. The main content area is titled 'ACTIVITY' and shows a transaction for 'DASH - DASH'. There is a '+ Summary' button and a message indicating that stake history older than 2020-05-22 is not shown. Below this, there is a 'FILTER' section with 'All transactions' selected and a 'LOG' section containing a single transaction record.

FILTER		LOG
